

JAYANTH KOTAPATI

UI/UX Designer | Product Designer | Interaction Designer

+91 80089 76639 | jayanthkotapati14@gmail.com | [LinkedIn](#) | [Behance](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

UI/UX Designer and Computer Science graduate with end-to-end product design experience across mobile first e-commerce and e-learning applications. Proficient in the full UX design process user research, wireframing, prototyping, usability testing, and design systems using Figma as the primary tool. Technical background in HTML, CSS, and React.js enables implementation-aware design and effective collaboration during developer handoff. Applies Design Thinking and Double Diamond methodologies to deliver user-centred, accessible digital experiences. Seeking a UI/UX Designer or Product Designer role in a team that values both research rigour and visual craft.

TECHNICAL SKILLS

UI/UX Design: User Research, Wireframing, Low-Fidelity Prototyping, High-Fidelity Prototyping, Visual Design, Interaction Design, Usability Testing, User-Centred Design (UCD), Design Systems, Component Libraries, Information Architecture, Onboarding Flow Design, Responsive Design, Mobile-First Design

Design Methodology: Design Thinking, Double Diamond, Competitive Analysis, Persona Development, Customer Journey Mapping, Task Flow Mapping, Iterative Design, Heuristic Evaluation.

Accessibility: Inclusive Design, Colour Contrast Compliance, Screen Reader Awareness.

Design Tools: Figma, Adobe Photoshop, Canva, FigJam.

Front-End: HTML, CSS, React.js.

Other Technical: Python, MySQL.

Collaboration: Cross-Functional Team Collaboration, Stakeholder Communication, Design Critique, Agile / Scrum Awareness.

DESIGN PROJECTS

Comfort Wear — E-Commerce Platform | [UI/UX Case Study](#) | [Figma](#)

- Designed 15+ high-fidelity responsive mobile screens applying minimalist visual design, deliberate typographic hierarchy, and a constrained colour system to reduce cognitive load throughout the end-to-end purchase journey.
- Conducted structured user research developing user personas and customer journey maps to identify friction points in the existing e-commerce experience before committing to any design direction.
- Facilitated iterative usability testing across multiple rounds with test participants, documenting observed failure points and resolving each through targeted design revisions measurably improving navigation efficiency and task completion.
- Delivered a fully interactive Figma prototype covering product discovery, cart management, and checkout flows including error states and edge cases.

Course-Online — E-Learning Platform | [UI/UX Case Study](#) | [Figma](#) | Adobe Photoshop

- Delivered 40+ responsive, mobile-first screens alongside a reusable component library and scalable design system, ensuring visual and interaction consistency across the full product surface area.
- Performed structured competitive analysis benchmarking Coursera, Udemy, and Skill share across onboarding, content discovery, and learner progression translating identified gaps into differentiated design decisions.
- Designed custom UI components, learner onboarding flows, information architecture, and progress-tracking patterns to support engagement and content discoverability.

Machine Learning Techniques for Detection of Malware Application | B. Tech Final Year Project 2024

- Developed CNN model to detect malicious Android applications.
- Utilized Python and ML libraries for classification.
- Built UI for non-technical users to interact with results.

INTERNSHIP

Cloud Computing Intern | Edu Skills

2023

- Provisioned and validated AWS services including EC2, S3, and IAM — building cross-domain technical context that directly informs design decisions for cloud-native, data-sensitive product interfaces.
- Explored machine learning service integrations on AWS, developing foundational awareness of AI-powered feature in ML-driven products.

Cybersecurity Intern | One Stop

2023

- Executed penetration tests and vulnerability assessments using Kali Linux, developing a security-aware design perspective applicable to designing permission flows, trust indicators, and error states in products handling sensitive user data.
- Identified and documented system failure modes systematically reinforcing structured analytical thinking directly transferable to usability testing, heuristic evaluation, and design iteration workflows.

EDUCATION

Bachelor of Technology — Computer Science & Engineering | Eluru College of Engineering and Technology

2020 – 2024

CGPA: 7.08 / 10.0

Intermediate — Mathematics, Physics, Chemistry (MPC) | Vidya Vikas Junior College

2018 – 2020

CGPA: 7.00 / 10.0

Secondary School Certificate (SSC) | Vidya Vikas High School

2017 – 2018

CGPA: 9.20 / 10.0

ACHIEVEMENTS & RECOGNITION

- Led visual design and layout for 3 editions of the college magazine — applying grid systems, typographic hierarchy, and consistent visual identity across print; recognised by the college chairman for outstanding design contributions.
- Designed event posters, banners, and communication assets for college-wide functions attended by 1,000+ students, delivering production-ready visual work under real deadlines.
